python

PROFILE

As a Software Engineer with experience in full-stack development and expertise in JavaScript, I bring a wealth of knowledge to any project. With a track record of delivering high-quality, scalable software solutions, I am a reliable team player who is passionate about solving complex technical challenges and well-versed in agile development methodologies and have experience collaborating with cross-functional teams to build end-to-end software solutions.

WORK EXPERIENCE

Fullstack Developer

Visit Health Private Limited

2022 march - present

- Developed and Maintained web apps by working on both frontend as well as backend aspect of code using frameworks like Node js , React js , MySQL.
- Developed APIs using Node js and MySQL for the backend service of applications
- worked on frontend as well as backend of the internal dashboards used for operations and customer service
- Guide and helped fresher developers
- Regular bug solving and resolving issues faced by the user
- Implemented well planned health policy system by contributing towards database structure and API development, improved a legacy codebase of user policy structure according to the requirement of the clients used by more than 1 million users
- Lead a project of creating hospital onboarding and operations web app used by more than 15000+ hospitals
- implemented kafka in corporate user onboarding into a policy structure which helped in optimizing the flow of onboarding
- set up multiple automated communications as per the user and hospital network requirement
- Creating and organization based structure of policy for more than 1 million users ,developed and altered api's in order to achieve this , lead this project to success with two subordinate developers

Full stack developer intern

2021 march - 2021 august

Mushin innnovation labs

- Worked on multiple service based applications as a fullstack - developer where in i developed APIs using node js and MongoDB whereas for frontend i used React js framework
- Delivered multiple solo as well as team projects and got to extract as much knowledge as i could from my teammates about structuring and developing codebase as well as database efficiently
- developed a hardware management web app for a vehicle hardware producing company 'shanti ispat'. This included the tracking of vehicle parts and their measurements to identify defects . Also creating a dashboard to visualize their yearly ,monthly or weekly reports of product manufacture
- Developed a e commerce web app for client that wanted to sell their car parts online . developed this from scratch using MERN stack . This included login through google tpa then listing the products according to filters and then finally payment using razorpay api.
