EXPERIENCE

- **Member Of Technical Staff 1**
- **Byjus: NodeJS, TypeScript, Javascript, Python, Java.**  Sep '22 - Present
 - Built end-to-end onboarding and chatbot modules to achieve **40% reduction** in **technical support calls**.
 - Built multiple services capable of handling a peak load of around **150 RPS** in **NodeJs** using caching techniques while **ensuring code quality** using Sonarscanner
 - Brainstormed and conceptualized **high level and sequence diagrams** for the **backend** architecture of core order punching platform developed using **NextJS**.
 - Contributed to the **catalog**(central repository for all Byjus offerings) project implementing high-performance and scalable API endpoints using **Spring Boot**.

PROJECTS

- **LogIt: Log Ingestor Pipeline**  
 - **Golang,Elasticsearch, Logstash, Kibana, Docker**  Nov'23
 - Architected a log ingestor pipeline using **Golang and ELK Stack**
 - Built a **kibana dashboard** to provide an **unified interface** to query application, error, database and deployment logs based on pattern time or text.
 - Achieved **containerization** and removal of local dependencies with **Docker compose**
 - **DependaTroll: Dependency Management CLI**  
 - **Python, Command Line Interface(CLI), Dependency Management**  Feb '21
 - Engineered a **CLI** that checks for unmet dependencies in nodeJs projects from repositories both private and public from input csv file
 - Eliminates the need for cloning entire repositories thus reducing storage overhead by 100% updates them to specified versions and creates pull requests
 - **GoAPI:Instagram User functionality in Go**  
 - **Go, GridFS, MongoDB, Docker**  Oct '21
 - Devised API in Golang following RESTful practices, utilizing standard Go packages plus MongoDB and GridFS for data storage.
 - Implemented **JWT authentication** and wrote **unit tests** to increase overall code coverage.
 - **YouWatched : Query Information From Youtube API**  
 - **NodeJs, ElasticSearch,Kibana,Nginx ,Cron**  Jul '22
 - Developed a **containerized, scalable backend** system to query Youtube at fixed interval
 - **ElasticSearch** effectively stores the information.**Pagination** is enabled to improve performance and restrict amount of returned data.

EDUCATION

- **Vellore Institute of Technology**  Vellore, India
- Bachelor of Technology - Information Technology; GPA: 8.90
- **Relevant Coursework:** Operating Systems, Data Structures and Algorithms, Machine Learning, Cloud Computing , Networking, Databases , Data Mining

SKILLS SUMMARY

- **Languages:** Python, C/C++, Java, Golang, JavaScript, SQL, Bash, TypeScript, PHP
- **Frameworks:** React, EJS, NodeJS, Handlebars, Django, Flask, Hugo, GORM , Selenium
- **Databases:** MySQL, Redis, MongoDB, SQLite, Firebase , Postgres ,
- **Tools:** Windows,Linux(Certified),Redash, Snowflake
- **Cloud Services:** AWS,GCP,Kubernetes,S3,Heroku,Netlify,Argo,Github Actions,Helm
- **Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

AWARDS & ACHIEVEMENTS

- Secured a **global rank of 130** in **CodeChef January Long Challenge** out of 15,000 participants(**Top 1%**).
- Global Rank **6995** in **Google KickStart Round G 2021**
- Secured a **global rank of 10652** in **Google Kickstart Round A 2022**
- Ranked **4459** amongst 1 Lakh Candidates(**Top 5%**) in **Google Kickstart Round B 2022**
- Three Stars on the CodeChef platform.
- Prize for the **best project (WeCare)** under healthcare domain in Access Denied Hackathon by IETE VIT
