EDUCATION

Army Institute of Technology (2019 - 2023)
Bachelor Of Engineering Computer Science
GPA: 8.64

Pune

EXPERIENCE

HelpShift | Backend Developer

Pune | June 2023 – Present

- Developed robust APIs, facilitating seamless data delivery from various teams to end users.
- Collaborated effectively within cross-functional teams, contributing to the collective success of projects. Engaged in rigorous code reviews using tools like Git and Gerrit, ensuring the delivery of industry-grade code.
- Utilized a suite of project management tools including JIRA and Slack to meticulously track and manage multiple projects. Crafted comprehensive test cases for Clojure-based functionalities, ensuring robustness and reliability.

FroshLink | React Developer Intern

Remote | July 2021 – October 2021

- Actively participated in the overall application cycle. Interacted with the team, brainstormed product ideas, and developed various front-end designs using JavaScript and Material-UI library from scratch.
- Created sustainable and functional web applications with clean codes.
- Learned about new technologies and stayed up to date with the current best practices.

SKILLS

Programming Languages

JavaScript

Libraries / Frameworks

Node.js, Git,

Tools / Platforms

GitHub, Gerrit, Jira, Confluence

Databases

SQL, NoSQL

PROJECTS / OPEN SOURCE

Animex (Chrome Extension) | [Link](#) [Video Link](#)

HTML, DOM, CSS, REST APIs

- Developed and designed Animex, a chrome extension that utilizes DOM, HTML, CSS, and Rest API to provide users with real-time data on the latest and most popular anime episodes.
- Utilized API integration to gather and display detailed information on top Airing Episodes and Popular Anime titles, providing users with up-to-date and accurate data on the latest trends and releases in the anime community
- Integrated responsive design and user-friendly interfaces, ensuring a seamless user experience

Real-Time Chat Application website | [Link](#) [Youtube Demo](#)

Node.js, Firebase, React.js, REST APIs, Material-UI

- Built real-time chat application using Node.js, Firebase, and React.js, fostering effective group communication and private messaging.
- Developed robust test cases using Jest for Node.js APIs, ensuring high code quality and reliability.
- Implemented secure Firebase authentication.
- Users could add members to the group and may leave any group chat.

Open-Source Contribution | [Link](#)

React.js, GitHub

- Contributed to the SimpliQ GitHub repository using frontend libraries like ReactJS and Material-UI
- Discussed changes in the UI/UX of the SimpliQ repository and merged the changes in the SimpliQ GitHub repository

QuickStyle Npm Package | [Link](#)

NPM, JavaScript

- An NPM package created using JavaScript, DOM, and CSS that helps non-designers in implementing a quick CSS on images, buttons, and text.

ACHIEVEMENTS

- Gold Standard Screening Test – Super Scholar
- Open-Source Contribution at SIMPIQ GitHub Repository
