Work Experience

SOFTWARE DEVELOPMENT ENGINEER - II | 11/2022 - Current

TEKSystems - Bangalore, India

Client - Atlassian

Roles:

- I have worked on the JIRA product Notification Schemes
- Experience wherein the earlier notifications were using the group name tags , now it will be using the group id. I have been part of this module to convert group name to group id.
- Also worked on reading the JIRA workflow UI details and updating the backend code to be mapper to group id.
- I have worked on cleaning up the unnecessary old code which is no longer in use and instead pointing the functionality towards using the new code.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs, and enhancements.
- Designed reusable and reliable code for use.
- Participated in sprint planning meetings and daily standups for Agile development process.

SENIOR SYSTEM ENGINEER | 03/2021 - 11/2022

IBM Consulting - Bangalore, India

Client - Delta Airlines

Roles :

- Involved in developing of an API that retrieves the crew list with summary information for a specific flight
- Facilitated root cause analysis of common system issues to meet customer needs
- Deploying the code using CI/CD pipelines in RedHat OpenShift
- Suggested improvements to systems and processes, improving efficiency and competitive company posture.

Client - Air New Zealand

Roles :

- Involved in designing and developing of the Barcode generation for the Flight Ticket and E-Voucher.
- Involved in developing of the Ticket Payment Receipt for the passengers' journey as per the design suggested by the client.
- Developing of the Rest APIs as per the business requirement.

ASSOCIATE SOFTWARE ENGINEER | 06/2018 - 03/2021

Virtusa Consulting Services Pvt. Ltd. - Bangalore, India

Client - British Telecommunications

Roles :

- Analyzed user needs and software requirements to determine feasibility of design within time.
- Involved in the development of business logic components.
Developed and directed software system testing and validation procedures.
- Enhanced interfaces to promote better functionality for users.
Checked configuration files and logs to uncover root causes of problems.

Trainee Software Engineer

- Vehicle Management System : Back-End Development of the project. It was a very basic version of cab booking application where a customer can book cabs based on requirement and availability.
- Online Examination Portal : Back-End Development of the project. It was like an Online Examination portal. It had MCQ questions, the result was shown through pie charts with respect to each student on their dashboard.
