SUMMARY

Results-driven technology professional with 8+ years of experience in the software development and cloud computing industries. Adept at leveraging a diverse skill set to design, develop, and deploy innovative solutions. Demonstrated success in delivering high-quality software on time and within budget, with a proven track record of leading teams and projects. Passionate about staying current with emerging technologies and continuously improving skills to drive project success. Known for fostering collaboration and contributing expertise and leadership to dynamic teams. Looking to bring my technical proficiency and leadership skills to a challenging role in a forward-thinking organization.

EXPERIENCE (September 2015 - Present)

Pramata Knowledge Solutions Pvt Ltd, Bangalore

Senior Software Engineer (2019 - 2024)

- Transformed the company's landscape by creating a Multi-tenant, distributed architecture featuring MFE and event-driven systems.
- Integrated data science models and NLP systems to automate manual processes, elevating human-in-loop operations
- Led the creation of three key applications for contract management, delivering a notable 10x speed boost in productivity in digitizing data.
- Improved cost-effectiveness and superior event-driven systems for streamlined customer solutions using AWS SNS, AWS Textract, AWS Batch, AWS Claude.
- Continuously innovated software solutions, focusing on enhancing performance, scalability, and maintainability.
- Designed process from conception to implementation, and ensured the verification of framework components using established software engineering methodologies.
