SUMMARY

Dedicated Frontend Developer with 2 years of experience in React and Next.js. Skilled in creating dynamic, user-centric web applications and collaborating effectively with cross-functional teams. Committed to staying up-to-date with the latest frontend technologies and driving innovation in web development.

SKILLS

React.js, Javascript, Typescript, HTML, CSS, Sass, Tailwind CSS, Redux, Next.js, Bootstrap, MongoDB, Socket.io

EXPERIENCE

Software Engineer, Coditas

Oct 2023 - Present

- Collaborated closely with UI/UX designers to implement pixel-perfect designs, ensuring a seamless and visually appealing user experience.
- Implemented state management using Redux, enhancing application scalability and maintainability.
- Integrated RESTful APIs and third-party libraries to extend application functionality and improve data retrieval efficiency.
- Actively participated in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, to foster a collaborative and efficient development environment.
- Stayed abreast of the latest React and front-end development trends, incorporating new technologies and methodologies to enhance project outcomes.

Associate Software Engineer, Coditas

Jan 2022 - Oct 2023

- Collaborated with senior developers to design and implement responsive user interfaces using React.js, contributing to the successful delivery of multiple project milestones.
- Assisted in the development and maintenance of web applications, focusing on front-end functionalities and user interactions.
- Implemented React components and UI features based on design specifications, ensuring a consistent and visually appealing user experience.
- Gained proficiency in version control using Git, branching, and merging code changes in collaborative development environments.

PROJECTS

CMS (Client)

Implemented a role-based authentication system. Each role had specific permissions, ensuring data security and access control and emphasized more on making reusable components.

Connectsy

- Leveraged Next.js, for building the frontend of the application. This allowed for efficient routing, server-side rendering, and seamless integration of Websockets.
- Implemented Websockets, specifically using libraries like Socket.io, to enable real-time chat functionality. Users could exchange messages instantly, providing a responsive and engaging user experience.

Slotify

- A dynamic website specifically designed for the Talent Acquisition team, streamlining the candidate interview process by eliminating the need for manual paperwork and ensuring seamless and effortless interviews.
- Leveraged React.js to create a dynamic and responsive user interface that allowed recruiters and interview panelists to easily manage and schedule interview slots.
- Integrated a calendar feature that displayed available interview slots, making it simple for users to view and select suitable time slots.
- Integrated reporting and analytics features to help recruiters and HR teams gain insights into interview scheduling efficiency.

EDUCATION

Bachelor of Technology, Computer Science
R.V.S College of Engineering and Technology

Aug 2018 – Jun 2022
CGPA: 9.39
