

## WORK EXPERIENCE

### DLHO Solutions - Senior Software Engineer

July 2023 – February 2023

- Implemented Jenkins pipeline for infrastructure provisioning and API deployment using AWS SAM Template.
- Co-op with the team to design, architect, and build our AppSync-powered GraphQL backend for the jobplaza.ng platform.

### ONRAMPER - Founding Software Engineer

Apr 2021 – April 2023

- Founding Team Member, I built the initial version of the core on-ramp aggregation system. I redefined user access to multi-cryptocurrency on/off onramps.
- Led the team in building a cutting-edge crypto-to-crypto swap system for ERC20 tokens on Ethereum, ensuring seamless and secure token exchanges.
- Mentored engineers, championed best practices, and conducted rigorous code reviews.
- Created a dynamic transaction routing system that intelligently suggests the most suitable on-ramp, considering key indicators, to successful transactions and optimize user value.
- Solidifying Onramper as a leader in efficient and effective on-ramp solutions, I utilized advanced data analysis to understand the target audience better and develop bespoke onboarding solution integrations.

### OREMI FINANCIAL SYSTEMS - Co-Founder / CTO

Mar 2021 – Feb 2023

- I co-founded a FinTech Startup with a solid vision to deliver value to customers needing ultimate financial control.
- Led a team of engineers in building our MVP cross-platform mobile product.

### FOOD SHARE LTD - System Operation Engineer

Sep 2020 – Oct 2020

- Worked in a team on a Nomad Microservice Infrastructure Cluster implementation for a mobile backend.
- Supported the technical implementation using Terraform, Google Cloud Platform, and Hashicorp Nomad & Consul.

### NEU ROBOTICS INC - Full-Stack Engineer

Mar 2020 – Sep 2020

- Worked on a full-stack geospatial analysis implementation of a realtor system for property data visualization in [KeplerGL 3D](#).
- Co-op with a team to design and implement an event-driving backend system based on the [Nats.io](#) message broker.
- Implemented a data processing pipeline for web scrapping, dynamic crawling & OCR of foreclosed property data.

### OPEN COLLECTIVE - Software Engineer (Open Source)

Jul 2019 – Mar 2020

- Worked in a team of open source engineers & code maintainers to maintain the largest community/crowdfund sourcing initiatives in open source.
- Managed bug fixes, issues triage & feature implementation.

## SKILLS & KNOWLEDGE AREA

Typescript (Node.js)

PostgreSQL

DevOps

Go

AWS / GCP / Azure

Grafana Cloud

Rust

FinTech Infrastructure

Web3 / Blockchain Integration

GraphQL (AppSync)

DynamoDB / Firebase

Serverless Computing
