PROFESSIONAL SUMMARY

As an experienced and results-driven software developer, I am dedicated to building software that prioritizes the end-user experience. My expertise lies in creating intuitive applications with a user-friendly interface, which entails comprehending requirement specifications, software design, coding, testing, and maintenance. I place a high premium on producing easily maintainable and readable source code. Given the ever-changing nature of the industry, I consistently strive to learn new technologies and enhance my skills.

WORK EXPERIENCE

Wipro Limited, Bengaluru, Karnataka

Senior Software Engineer
Aug 2022 - Present

Soft Spectrum Technology, Indore, Madhya Pradesh

Senior iOS Developer
July 2017 - July 2022

SKILLS

Language: Swift, SwiftUI, Objective-C (Readability)

Frameworks: Cocoa Touch, Foundation, UIKit, Auto Layout, XCTest, Unit Tests

Tools: Xcode, Git, SVN, TestFlight, Bit Bucket, Jira, CrashLytics, AppBox, Mac OS Terminal, Network Link Conditioner, Appium Inspector, Radar, Quip.

EDUCATIONAL QUALIFICATION

Bachelor Of Engineering in Computer Science

Malwa Institute Of Science & Technology, Indore Affiliated to R.G.P.V, Bhopal

Higher Secondary Education

M.P. Board

High School Education

ICSE Board

PROJECTS

1. Demo Discovery Builder & Explore

Client: Apple Inc.

Description: The Demo Discovery software enables Apple's Retail Systems to be more dynamic to facilitate much convenience to end users. Demo Discovery consists of two applications a builder app on macOS that enables users to drag and drop SwiftUI elements to create dynamic content for their application without writing SwiftUI code. On the other hand, Explore is an iOS App that runs on demo devices in Apple Retail Stores which displays the package built on builder to users walking in stores according to region, device, language, etc.

Technology: SwiftUI, Swift 5.9, Swift Package Manager, SignKit, PierogiKit, AppleConnectClient, DemoDiscoveryCore, DemoDiscoveryUI.

2. Kmimos

Client: Undisclosed

Description: This app eases pet lovers to find caretakers when they are absent from their pets or out of town. Further, the application enables several filters to search nearby caregivers. and also provide another application where caregivers can register themselves

Technology: Swift 5.5, Google Maps, Google Maps Clustering, Cocoapods

ACHIEVEMENTS & RESPONSIBILITY

- Star Award for Outstanding Performance from Wipro.
- Recieved Pillar of the Month Award
- Received client Appreciation emails for the tasks undertaken, from **Apple**.
- Worked on POC to demonstrate the existing Explore App on **VisionOS**.
- Got an award from Wipro for being a Habit Flagbearer for handling team responsibly.
