## PERSONAL PROJECTS

### Waste To Taste Mobile App

- Created an Android app with Flutter and Firebase to connect food donors and recipients, reducing wastage and promoting awareness.[source code](#)

### Taraseva Mobile App

- Developed an app for Tarapith temple worshippers, offering user-friendly services like accommodations, cab reservations, and virtual worship experiences.[source code](#)

### Me Chef Mobile App

- The app allows users to contribute their recipes and explore a carefully selected list of pre-defined recipes for preparing delicious meals.[source code](#)

### Sangeet - A Music Mobile App

- The app features a minimalist design, providing an enjoyable experience for listening to music.[source code](#)

### BMI Calculator Mobile App

- My very first Flutter application with minimal UI and fully working BMI calculations.[source code](#)

## CERTIFICATES

### SRM Builds 4.0 (12/2023 - 12/2023)

SRM Builds 4.0 was a 36-hour intercollege hackathon where we developed the application "Waste To Taste" using Flutter and Firebase.

### SRM Builds 3.0 - Winner (04/2023 - 04/2023)

It was a 24-hour intra-college hackathon where we developed the "Me Chef" application using Flutter and Firebase.

### SRM Builds 2.0 - Runner-up (12/2022 - 12/2022)

It was a 36-hour intra-college hackathon where we developed a news application "Jansatta" using Kotlin and XML.

### GDSC Technical Lead (08/2023 - Present)
