EDUCATION

Sies Graduate School Of Technology

Navi Mumbai, India

Bachelor of Engineering in Electronics and Telecommunication; CGPA: (8.5/10)

August 2019 – August 2023

EXPERIENCE

LTIMINDTREE

Remote (Mumbai), India

Software Engineer Intern

April 2023 - August 2023

Problem: Collaborated with senior developers to containerize a Node.js backend project for deployment on AWS serverless infrastructure.

Solution: Utilized Docker to containerize the backend application and configured AWS Lambda and API Gateway for deployment automation.

Outcome:

- Achieved seamless deployment of the containerized application.
- Implemented a cost-effective serverless architecture for improved scalability and reliability.

E-stone

Vashi, India

Web Developer Intern ([Will Website](#))

September 2022 – march 2023

Problem Solved: Developed a secure will-making website for Eastone.

How the Problem Was Solved: Used T3 stack with NextAuth.js, SQLite, and Prisma for user security. Implemented Aadhar verification and TRPC for robust authentication and seamless backend communication. Enhanced user experience with React Query and Zustand for efficient state management.

Result Achieved:

- 30% reduction in authentication vulnerabilities.
- 20% increase in overall user satisfaction.
- 40% higher user completion rates in diverse will creation categories.

PROJECTS

ChatGPT Clone: ([Website](#))

- **AI Assistant Development:** Created a personalized AI assistant using Next.js, TypeScript, and Tailwind CSS for a seamless user interface. Implemented a chat system with saved conversation history, allowing users to easily reference and track previous interactions.
- **Backend Integration:** Leveraged Supabase to establish a robust backend, ensuring secure data storage and retrieval.
- **State Management:** Utilized Zustand to manage application state, facilitating smooth transitions and interactions.
- **UI Components:** Integrated the Shadcn UI library for aesthetically pleasing and responsive user interface elements.

Spotify Clone: ([Github](#))

- **Tech Stack:** Developed a Spotify clone using Tailwind CSS and TypeScript for a sleek and responsive UI, with Supabase handling the backend and user authentication.
- **Real-time Updates:** Integrated Supabase to enable real-time features, ensuring instant updates on playlists and user interactions.
- **TypeScript Advantage:** Leveraged TypeScript for enhanced code quality, reducing bugs and improving development efficiency.

PROGRAMMING SKILLS

Languages: C++, SQL, JavaScript, Typescript, Python

Database: MongoDB, SQLite, Postgres

Technologies: Nextjs, Reactjs, Prisma, Trpc, Nextauth, Rest-API, Mongoose, Supabase, Zustand, React-query, Docker, AWS

Achievements

- **Solved 200+** problems on leetcode.
- **Ex Co-founder Lenic Fashion** -A one stop platform for shopping Trendy and Reliable clothes.
- **Head of Production and management Team** of our college.
- **Volunteer** of National Service Scheme (NSS).

Certificates

- 30 Days Of Google Cloud,
- The Complete 2022-Web Developer Bootcamp
