

# Saiteja Boppana

Web Developer

📍 Bengaluru, India | 📞 +91 8919068182 | ✉ [boppanasaiteja1995@gmail.com](mailto:boppanasaiteja1995@gmail.com)

## Summary

---

Web developer with 6+ years of experience in building large scale and accessible web applications in diverse domains using top JavaScript frameworks. Specialises in **front-end technologies** and passionate about modern web standards and evolving development trends. Looking forward to full stack opportunities that help me further scale up my abilities.

## Work Experience

---

### EPAM Systems

Nov 2021 - Present

Software Engineer

Hyderabad

🔗 <https://www.epam.com>

- Made significant contributions in the development of web applications in multiple domains including banking, credit analytics, real estate and pharma etc.
- Addressed application performance issues and was responsible for optimising app performance by 20%.
- Responsible for fixing production level incidents within stipulated timelines.
- Mentored a team of three junior developers in one of my projects, which led to their increased technical abilities and productivity levels.

### Mindtree Ltd

Feb 2018 - Nov 2021

Software Engineer

Bangalore

🔗 <https://www.ltimindtree.com>

- Involved in the development of web application suite for a major real estate firm based out of US markets.
- Owned responsibility for integration of third-party apps/services such as Google Tag Manager (GTM) analytics library and feature flags service LaunchDarkly into our web application.
- Involved in the design and implementation of POCs related to new services within internal company platforms.

Projects

Scorecards (S&P Global)

July 2023 - Present

A web application built to provide credit risk analytics to the users of projects with quarterly and annual assessments thereby enabling investors to make informed decisions.

Roles and Responsibilities:

- Worked on Scorecards micro frontend application with React JS, HTML and styling driven by CSS modules.
- Extensively worked with Redux Toolkit with RTK Query in integrating with backend services layer.
- Implemented end to end feature of assessment charts view with React High Charts library.
- Created a well-designed, testable, efficient codebase using best software development practices.
- Actively collaborated in agile based scrum framework and closely worked with all the stakeholders to improve the product quality.
- Involved in writing unit tests with Jest and React Testing library(RTL) and maintained code coverage thresholds to 80%.

Branch Connect(Digital banking)

Dec 2021 - May 2023

An all in one digital platform which offers various banking services to its diverse customers.

Roles and Responsibilities:

- Worked with DBS Tech India - Branches and Self Service Banking platform for 1.5 years via EPAM as vendor. Made major contributions as an individual developer and in addition, mentored three junior developers in the project.
- Worked extensively with third party libraries like Formik for maintaining complex forms, Yup for data validations and middleware like Redux Sagas and custom react hooks.
- Worked on an application involving Next JS App based router, Tailwind CSS and Graph QL and gained good exposure on server-side rendering techniques.
- Responsible for development and maintenance of reusable UI components, custom hooks and a micro frontend application.
- Engaged in the development of various digital banking features for an application used directly in branches by tellers of DBS Bank, Singapore.

Realogy APM

June 2020 - Nov 2021

A Real estate firm offering digital services to its agents and clients.

Roles and Responsibilities:

- Involved in the development, publishing and maintenance of reusable UI components within our custom NPM packages.
- Worked with Reactive forms(Angular) and also integrating third party libraries like Okta for authentication and Launch darkly feature flag services.
- Developed profile manager application for real estate agents and worked on embedding it in other client applications.
