---

- |  |                   |
|--|-------------------|
| <b>Working as Data Engineer for a US based Ship towing company</b><br>I am working as a data engineer on this project where we are implementing EAP platform for our customer using lakehouse medallion architecture, for ETL pipelines development we are using DLT framework of Azure Databricks and for data governance and storage we are using unity catalog. Technical skills include:- Pyspark, DLT, Unity Catalog, Delta Lake, Azure databricks, SQL, Python | 01/2024 – present |
|--|-------------------|

## **Currently Working on MDM Solution for US-Based Railcar Pooling Company,** *Nagarro*

12/2022 – present

I am currently working on a project to design, develop, and implement an MDM solution for a US-based railcar pooling company. I am working in a small team of 3 data engineers, and I am responsible for handling the Profisee MDM part as well as developing the ETL pipeline in Azure Synapse to ingest the raw data into MDM Profisee and to take enriched data from MDM Profisee to ODS and RDS layer for data warehousing.
