WORK EXPERIENCE

Accenture India

Advanced Application Engineering Analyst (Gen AI Assets DU)

2023—Present

Hyderabad, India

- Created a web portal to fulfil the requirements of a portal to manage the customer orders
- Java, Spring Boot, Full Stack Development
- Python, AI, ML

Rakuten India

Software Development Intern, Data Platform Department

2022

Bangalore, India

- Conducted the SSL Proxying to view SSL requests and responses in plain text, aiding backend testing by repeating requests and editing them for various inputs
 - Performed QA testing and scenarios of the application of Geo-SDK product which is an easily integrable mobile SDK (android and iOS) that provides capability to collect location data (event or poll based) with utmost data quality and optimized battery performance, identified several issues while testing with different use-cases of the application
 - Utilized Burp Suite and Charles for app debugging, making necessary adjustments to request and response configurations.
- JavaScript, App flow, Debugging, Burp suite, Charles, Backend Development

PROJECTS

Shopoholic (E-Commerce Website)

2020—2021

- Developed and designed an E-Commerce web application facilitating retailers to sell products to customers
- Created three interfaces: for vendors, users, and admin, with additional user-friendly features including password encryption, email verification during signup, and password recovery
- Technologies used:
 - Frontend - HTML5, CSS3, JavaScript, Bootstrap
 - Backend - Flask and Python
 - Database Management System - MySQL.

Library Management System

2021

- Developed an app allowing visitors to search GitHub users and display relevant profile information such as the number of repositories and list of followers
 - Implemented React hooks and React Router for page setup and navigation, and utilized fusion charts for professional data visualization of user repositories
 - Included a search bar enabling users to input a GitHub username and retrieve corresponding data.
- React Hooks, React Router

My Portfolio

2023

- Created a responsive portfolio using HTML5, CSS, Flexbox, and Grid layout, effectively showcasing my profile and projects
 - Utilized CSS Grid to ensure a dynamic layout that adjusts seamlessly to varying screen dimensions.
- HTML5, CSS3, Flexbox
