Jun 2021 - Jul 2021

- Developing an Android chat application using IBM Worklight, enabling users to communicate, react with emojis, upload stories, and optimize storage space.

Skills

C++ | Java | Spring Boot | MySQL | Python | JavaScript | NodeJS | MongoDB | Android Development | Firebase | Git | Machine Learning

Projects

Venture Capitalist

Feb 2023

Venture Capitalist Platform facilitates seamless fundraising, encourages collaboration, and provides in-depth investment insights for efficient decision-making.

- The platform simplifies fundraising, connecting entrepreneurs with venture capitalists for efficient collaboration.
- Utilizes a tech stack including Spring Boot, Spring Security, PostgreSQL, and Java 17 for robust functionality and security.

Gym Pose Estimation

Feb 2022

Media Pipe Pose: Precision in human pose estimation via RGB video frames for gesture control and sign language recognition.

- Utilizes RGB video frames for accurate tracking of 33 3D landmarks across the entire human body.
- Essential for applications ranging from gesture control to sign language recognition.

Chat Bot

Jul 2021

Efficient and minimalist chat app for direct conversations, emoji reactions, and story sharing with minimal storage impact

- Facilitates user-to-user chat functionality, emphasizing simplicity and direct communication.
- Allows users to react with emojis and upload stories, offering a space-efficient solution amidst the trend of resource-intensive applications.
