## EDUCATION

**Indian Institute of Technology**, Roorkee, Uttarakhand  
B.Tech

November 2020 - May 2024  
Overall GPA: 8.295

## EXPERIENCE

**FoxLedger Studios**  
*Web Development Intern*

Gurugram, Delhi(Remote)  
October 2022 - March 2023

- Developed multiple customized Websites and WebApps for various clients, primarily using ReactJS and JavaScript.
- Collaborated closely with Project Managers and UI/UX Designers, to ensure a clear understanding of client needs.
- Improved the client satisfaction by 25% through user-centric design, resulting in a 30% increase in user engagement.

## PROJECTS

**Kurama**  
*Project Link: <https://kurama.io/>*

November 2022 - January 2023

- Contributed to the creation of Kurama's holistic ecosystem, providing a comprehensive set of services and features.
- Crafted the user experience by designing and implementing key components, including the login page, profile page, and blog page for Kurama, ensuring an intuitive and engaging interface for NFT holders, creators, and enthusiasts.
- Integrated secure multi-wallet support by implementing a robust authentication system leveraging web3 libraries.

**8sian Xmas WebApp**  
*Project Link: <https://8sian.foxledger.studio/>*

December 2022

- Spearheaded the creation of the 8sian Xmas WebApp, enabling 8sian NFT holders to customize their digital assets.
- Implemented multi-wallet login functionality using Web3 libraries, allowing users to connect via various Web3 wallets.
- Leveraged ReactJS and JavaScript for Frontend development, ensuring a responsive interface with fast load times.

**Kenomi DApp**  
*Project Link: <https://kenomi.foxledger.studio/>*

November 2022

- Engineered a user-friendly interface for Kenomi Marketplace(DApp), enabling visitors to browse/buy available NFTs.
- Implemented a dynamic community page, providing real-time data on the Kenomi community including the floor price, volume, newly minted NFTs, also utilized ChartJS to provide a visual representation for variation in pricing.
- Incorporated secure smart contract integration through instance creation in JavaScript, guaranteeing transparent and tamper-proof transactions, fostering user confidence in the safety and efficiency of purchases on the platform.

## POSITIONS OF RESPONSIBILITY

**Web Development Head**  
*Students' Technical Council*

November 2022 - June 2023

- Directed a two-tier team of 5 skilled developers, emphasizing collaboration and skill enhancement within the team.
- Organized and oversaw diverse initiatives and activities including various workshops, events, hackathons and the central repository of technical resources to assist STC's mission of advancing the technical culture at IIT Roorkee.
- Streamlined various processes and ensured information sharing about tech groups and events in the IITR campus.

**Tech Lead**  
*TechShila: Inter Bhawan Tech Meet '23*

April 2023

- Managed the Software Development problem statement, ensuring seamless execution by actively engaging with participants in the discord servers providing clarifications on technical doubts/issues regarding the problem statement.
- Led the development of TechShila WebApp, a dynamic web platform, utilizing the power of ReactJS and JavaScript.

**Frontend Lead**  
*Thomso'22*

July 2022 - November 2022

- Managed and led a dynamic Frontend Web Development team comprising of over 10 members, facilitating seamless transitions from design to development through regularly scheduled cross-vertical and team collaboration meetings.
- Streamlined the on-site processes by introducing key new features including schedules, event locations, artist lineups, and ticket booking, reducing on-site inquiries by 15% and boosting interactive engagement about the events by 40%.
- Achieved over 1 million hits on our suite of technical products, revitalizing and enhancing Thomso's digital presence
