PROFILE

Innovative Software Developer with over 7 years of experience in problem-solving, solution design, and API development and integration. Proven ability to modernize legacy applications and build scalable, high-performance systems that meet business requirements.

EMPLOYMENT HISTORY

Cloud Native Software Developer at Rackspace Technologies, Gurgaon

January 2021 — Present

Working with a Financing company to modernize and migrate their existing money transfer application to AWS cloud.

- **Role:** Understanding business requirements, designing and Implementing complex business solutions, code reviews and mentoring junior resources.
- **Achievements:** Recognized for solutioning routing engine, a tool which integrates with in-house and 3rd party banking services to find the best bank for a transaction.
- **Technologies Used:** Java, Springboot, JPA, Mockito, PostgreSQL, Angular, TypeScript, microservices, Nodejs, Docker, AWS API gateway, lambda, EKS etc.

Business Technology Analyst at Deloitte , Hyderabad

March 2019 — January 2021

Worked with one of the world's biggest Automobile company, helped them to migrate and transform data from their legacy systems to SAP using microservice driven interfaces to seamlessly transfer data from source to destination.

- **Role:** Analyzing and designing the architecture of the interfaces, developing and deploying APIs, Unit testing.
- **Achievements:** Got appreciation from client for delivering an optimized and efficient solution for a heavy volume/large data interface.
- **Technologies Used:** JAVA, Spring Boot, JPA, JUnit, Mockito, MSSQL, SFTP, ActiveMQ, PCF, SAP ODATA

Senior System Engineer at Infosys Ltd., Hyderabad

July 2016 — January 2019

Migrated a monolithic application to microservice architecture for one of the global Telecom provider and helped them to scale their business with almost no outage by decoupling the system into independent modules.

- **Role:** Implementing and developing RESTful APIs, integrating them with other microservices, used JSON data type for request and response.
- **Achievements:** Automated the deployment of AWS API gateway to microservices using Linux shell script and Python and integrated it into CI/CD pipeline.
- **Technologies Used:** JAVA, Spring Boot, JPA, Oracle SQL Developer, AWS API Gateway, Docker

CERTIFICATIONS

AWS Certified Solution Architect Associate

EDUCATION

B-Tech, Graphic Era Hill University, Dehradun

August 2012 — June 2016
