Skills

Languages: Golang | Javascript | Typescript .
Technology: Node.js | Express.js | Nestjs | Gorm | MongoDB | MySQL | PostgreSQL | MSSQL | Docker | Angular | Vue.js | React.js | Next.js | Linux | Unix | Github | Azure | Bitbucket | Gitlab | CI/CD | Microservice | Kubernetes | Distributed System | AWS | RabbitMQ | gRPC | GraphQL | RestAPI | Redis | Jest | Unit testing | Jira | SPARQL.

Professional Experience

Proxify

Senior Software Engineer – Lead Backend Engineer

(Golang, Node.js, Express.js, AWS, RabbitMQ, Github, gRPC, Redis, Gorm, Linux, PostgreSQL, MongoDB, MySQL, SPARQL, Jest, RestAPI, Redis, React.js)

Implementing system architectural design | Integrated the SPARQL | Create automated query for SPARQL | Containerisation with docker, docker compose | Perform code review | Led developer to build SaaS

Remote – Europe

Jun 2023 – present

Backstage.army

Software/Product Engineer – Lead Product Engineer / Backend Engineer

(Golang, Node.js, AWS, RabbitMQ, Github, gRPC, GraphQL, Redis, Beego, Linux, Unix, Linux Administration)

Implementing system architectural design | Built an Integrated wallet system | Built in Microservice | Containerisation with docker, docker compose and kubernetes | Perform code reviewing | Working with graphql and gRPC

Remote – Los Angeles, USA

May 2022 – Jun 2023

Sterling Bank Nigeria

Software Developer – Technical Lead Engineer / Fullstack Engineer

(Angular, Golang, Gorm, Azure, MSSQL Flutter, Nodejs, Javascript, Typescript, Flask)

Led the design and development of multiple enterprise-level banking system which few parts are built in Microservice | Set up initial frontend projects using Angular, backend projects using Golang and Node.js | Analyzing and debug system architectural design | Build Rest APIs with Golang and Node.js | Maintaining the stability of live production projects | Make API calls with frontend frameworks | Writes multiple scripts to ensure cross browsing compliance | Worked with docker for containerisation and azure for CI/CD.

Remote – Lagos, Nigeria

Jul 2019 – Oct 2023

Superflux Int. Ltd.

Software Developer – Team Lead / Fullstack Engineer

(Golang, Node.js, Laravel, Codeigniter, Python, Django, Gorm, MySQL AWS, Angular, VueJs, Linux, Unix, Linux Administration, Javascript, Typescript)

Led a team of backend and frontend developer to analyzing and debugging projects | Setting up the initial backend and frontend projects for scalability | Maintaining the stability of all live systems | design system architecture and develop RESTFUL application | Outlining and presenting specifications for all software requirements | Wrote multiple script to ensure cross browser compliance.

Lagos, Nigeria

Jul 2016 – Jul 2019

MeetNetwork

Web Developer (PHP, HTML, CSS, Node.js, Javascript)

Maintaining performance of existing client websites | Build new website for client | Suggesting improvements on design and functionality | Maintaining continuity throughout all websites both technically and creatively | Providing aftercare support for clients on assessing the performance of their sites.

Lagos, Nigeria.

Mar 2013 – Nov 2015

Projects

SaaS | Loan Application | Payment gateway | Wallet integration | Customer Relation Management System | Human Resources Management System | Distribution management system | Warehousing Management System | E-Commerce | Chat Application.

Education

National Institute of Information Technology

DNIIT (HND) in Software Engineering

Lagos, Nigeria

2013 – 2017
