Summary

Full-stack veteran with 7+ years working on Web3, React, Angular, and Spring to build & deploy performant web apps. Proven leader, collaborator, and tech enthusiast, ready to tackle the toughest challenges.

Experience

Coditas Solutions LLP | Pune

Tech Lead | 11/2020 - Present

Currently working on building Travel and loyalty Platform for JP Morgan & Chase using a micro-frontend architecture.

- Developed component library with over 30 web components and js SDKs which helped consuming teams in faster development lifecycles
- Worked with Accessibility experts in making the application and individual components WCAG 2.1 ADA-compliant
- Worked with UX designers to create end-user-friendly mockups
- Helping in daily SRE to bring down the application exception counts by 80%
- Created Grafana and Kibana dashboards which helped bring down time spent on log analysis by over 90%
- Wrote functional and e2e automation tests suites to automate release cycle testing
- Worked on building the original shell for the micro frontend apps which serve as a base for consuming teams
- Led a team of developers and helping them in their daily tasks to achieve project milestones

Coditas Solutions LLP | Pune

Software Developer | 08/2018 - 11/2020

Worked on multiple ReactJS projects for RBS client

- Engage - A B2B application for the customer support team. Worked on building the form module, which served as the app's backbone. Also, contributed to architecture-level decisions, and identifying tech debts.
- RBS CMS - Worked independently on creating an internal CMS tool based on ReactJS and Sprint framework that would facilitate multiple teams in managing client sites.
- RBS Travel: Angular 4 project in the travel domain for RBS bank. Worked on the development of core components and apps.

Tech Mahindra | Pune

Jr Software Engineer | 08/2016 - 08/2018

Worked as a Jr Software Engineer at Tech Mahindra, where I gained experience in software development. Collaborated with team members to develop and maintain software applications, conducted testing and debugging.
