EDUCATION

Pillai College of Engineering

Bachelor of Technology

Computer Engineering

Cumulative GPA: 8.4/10

Navi Mumbai, MH

May 2023

EXPERIENCE

Cuvette

Bengaluru, KA

FullStack Development Internship Program

September 2023 - January 2024

- Developed multiple projects using MERN stack during the internship training program, demonstrating proficiency in technologies like MongoDB, Express.js, React.js and Node.js.
- Applied theoretical knowledge into practical scenarios, gaining insights into the challenges and nuances of real world project development.
- Identified and resolved issues to ensure the delivery of high-quality solutions, demonstrating the ability to analyze and overcome challenges.

CRIS (Centre for Railway Information System)

Mumbai, MH

Summer Intern

June 2023 – July 2023

- Spearheaded collaborative efforts with a cross-functional team of four to successfully complete the Corporate Social Responsibility (CSR) project.
- Optimized and revamped more than five web pages for the CSR project, incorporating user-friendly experience by leveraging JavaScript, HTML, CSS to create interactive web pages, enhanced user engagement that aligned with the goals of the CSR project.

PROJECTS

Musicart

- Built an E-Commerce platform for Headphones, overseeing the end-to-end process from design to implementation.
- Engineered APIs to establish a secure user connection, allowing seamless addition of products to the cart and effortless purchase transactions.
- Integrated APIs to add features like brand, type, cost and color filters, providing users with a range of customization options.

Swiptory

- Developed Swiptory a social media application focused on user-generated stories for an engaging content experience and effortlessly navigating through personal feed and discovering new stories using categorized filters.
- Built and integrated RESTful APIs to establish a robust user authentication system, enhancing the overall security of story posting and user interactions.
- Implemented APIs to enable interactive features, such as likes and bookmarks, contributing to an engaging user experience.

Pocket Notes

- Created a note-taking app that empowers users to efficiently input and save important notes by creating notes groups, facilitating organized and structured note taking.
- Implemented a robust system to store both notes and groups made by users, securely in Local Storage, ensuring data availability and security.
