WORK EXPERIENCE

Senior Software Developer Quantiphi Inc.

07/2023 - Present

Mumbai

Projects

- Working in the capacity of a backend developer, helping automate RFP creation, resource selection and shortlisting for a leading tech giant. Developing delivery readiness scoring (DRI) engine, manual approval workflows and integrating generative AI.
- Responsible for backlog planning, stakeholder management and best practices setup.

Framework Engineer - SDE Quantiphi Inc.

07/2021 - 06/2023

Mumbai

Achievements/Tasks

- Developed and streamlined connector APIs integrated into Quantiphi's 'Integration Hive' enabling effortless interaction with CRM databases. These versatile connectors, including Salesforce, ServiceNow, EPIC, Zendesk, HDE and Workday are configurable actions in the conversation designer, enhancing product functionality.
- Also played a vital role in supporting GTM teams during various solution pitch presentations.
- Contributed in developing Content and Knowledge Management System for Quantiphi. Developed features like Search Engine and Advance Filters, Role based access control for the APIs, Approval mechanisms and Code Sanity Check microservice on the platform.
- Independently developed a solution for the sales team which involves capturing live changes on the CRM via webhooks and updating the google sheets with the latest data. Developed and deployed a few other clean up scripts as cron job to maintain the sanity of data.

Software Development Engineer - Intern Innovatech Technology Solutions

09/2020 - 02/2021

Hyderabad

Projects

- Developed dashboard on the frontend for the service portal of Department of Community Development Abu Dhabi.
- Developed a feature for DCD which allows the user to download dashboard and other content as ppt.
