- Technology Used: React Js, Node Js, MSQl

Sr Analyst

Capgemini India

2021-2023

- Role Description: Front-End developer,Responsibility of designing and developing the pricing page for their website.
- This project aimed to enhance the user experience and provide customers with a seamless and intuitive pricing exploration process.
- Understood the business requirement in the agile team for the frontend. Coordinated with other internal teams including Quality Assurance, Project Operations development and web site designers.
- Implemented interactive elements such as sliders, dropdown menus, and tooltips, providing users with intuitive controls and helpful information throughout the pricing selection process.
- Dynamic pricing functionality that allowed customers to customize their orders based on different product configurations, such as door styles, window sizes, and additional features.
- To accomplish this, I integrated the frontend with the backend pricing engine, using APIs to retrieve real-time pricing data and updating the page dynamically as customers made their selections. Classification: Internal
