E-mail

bhagyashri156039@gmail.com

Skills

Languages: Java, JavaScript, C/C++

Strong understanding of database systems (MySQL, MongoDB)

Strong understanding of Agile development methodologies

Hands-on experience with version control using Git.

Commitment to industry coding standards and comprehensive technical documentation creation

Web Development: React.js, Next.js, Node.js

Java Frameworks: Spring, Spring boot

Github

<https://github.com/Bhagyashri5713>

Result-oriented Software developer with over 2 years of experience in software development, specializing in building scalable and high-performance systems. Proficient in Java, and Agile methodologies. Adept at problem-solving and implementing solid principles to ensure the reliability and efficiency of software systems. Currently leveraging expertise in React.js, Next.js, and blockchain technologies in an early-stage startup environment.

Experience

Full Stack Developer

linkDOT / 05/2023 - Present

- Actively participate in code reviews and contribute to the development of web3 applications using Next.js, React.js, and blockchain technologies.
- Collaborate with cross-functional teams to ensure the successful implementation of features, adhering to best practices and coding standards.
- Facilitated proof of work sharing, resulting in a 15% increase in user engagement within the first quarter.
- Implemented a reward system leading to a 20% rise in user retention rates and a 25% increase in daily active users over a six-month period.
- Collaborated in the development of Next.js modules, resulting in a 20% increase in application efficiency.
- Engage in continuous learning and self-improvement to stay abreast of emerging technologies in the web development space.

Freelancer

KNIGHT SOLUTIONS PVT. LTD / 03/2023 - 05/2023

- Led the development of full-stack application, receiving positive client feedback and a 90% satisfaction rate.
- Improved React.js performance by 25% through code optimization and architecture enhancements.

Member of Technical Staff

Amdocs / 06/2021 - 12/2022

- Managed an application with a user base of 2 million daily users, contributing to a 10% improvement in application uptime and a 15% increase in overall user satisfaction based on feedback surveys.
- Spearheaded initiatives to implement robust and efficient system functionality using Java and Spring Boot.
- Actively participated in product and design discussions, resulting in the integration of user-centric features that led to a 12% rise in user engagement metrics.
- Applied SOLID principles to ensure robust and scalable code for billing systems serving 2 million users monthly.
- Implemented automated solutions using Selenium, resulting in a 25% reduction in manual testing efforts and an improvement of 30% in testing accuracy, ensuring a more robust and reliable application.

Education

B. Tech in Information Technology

Kolhapur Institute of Technology, College of Engineering / 07/2018 - 07/2021
Kolhapur

- GPA: 8.59/10

Internships

Software Engineer Intern

Manorama InfoSolutions / 01/2021 - 06/2021

- Upheld coding best practices and industry standards, resulting in a 20% decrease in post-release defects and an 18% improvement in overall code maintainability.
- Contributed to the implementation of testing integration with development, resulting in a 25% decrease in the average bug-fixing time, ensuring on-time software delivery.

Project

LinkDOT App

- **Tech Stack:** Next.js, React.js, TypeScript, MongoDB, Prisma, GraphQL, MetaMask.
- Developed and integrated new features into the Web3 platform, contributing to a 15% increase in user engagement by offering enhanced functionalities and seamless user experiences.
- Successfully implemented a reward system that significantly boosted user retention rates by 20% and daily active users by 25% within a six-month timeframe.

Notion Clone Project:

- Developed a fully functional Notion clone with real-time collaboration, a Notion-style editor, and dynamic icons.
- Key features include Light/Dark mode, infinite nested documents, Trash can with soft delete, authentication, and file management.
- Implemented a responsive design, publishing to the web, and a recover deleted files feature.

Movie Review Application:

- Developed a loosely coupled full-stack application using MongoDB for the database, Java, Spring Boot for the backend, and React for the front end.
- Implemented HTTP GET requests to retrieve data from a remote server through communicating with relevant API endpoints and HTTP POST requests to save data on the server side.

Key Strengths:

- Over 1 year of hands-on experience in software development, demonstrating strong problem-solving skills and a solid understanding of CS fundamental concepts.
- Proactive learner, consistently adapting to new technologies and project requirements.
- Actively participated in enhancing skills through freelancing, focusing on React.js, JavaScript, and Node.js.
- Passion for customer interaction and a commitment to exceeding customer expectations.
