Rebolt - EV Charging

- The Rebolt – EV Charging mobile app lets you locate EV Charging Stations in the Rebolt Charging Network and charge your Electric Vehicle (EV) in three simple steps
- Some of the features of the Rebolt app include:
- Map-based Location Search
- Easily search and find your nearest Rebolt EV Charging Station on a map. Use our filters to narrow your search based on locations, connector types, charging station types, current availability, and more. Switch to the list view as and when required.
- Book a Slot
- Book a slot for your next EV Charging session with just two clicks. And it's free!
- Rebolt Wallet
- Top-up your Rebolt Wallet using multiple payment options including credit & debit cards, net banking, UPI apps, and other well-known wallets.
- Track Your Transactions
- Manage your bookings, top-ups, payments, and charging history in the Rebolt app.
- Rewards
- Earn and track your charging credits (Bolts) and coupons that you earn with every charging session from your favorite brands
- Notifications
- Keep up to date with your bookings, charging sessions, payments, rewards, and all that's happening at Rebolt with notifications on your app.
- Live support
- Use our Chat feature to talk to our support team for any queries or assistance, at any point in time.

Apple app store url - <https://apps.apple.com/us/app/rebolt-ev-charging/id1593336202>

D-date

- Based on a dating theme where a user is created and user can sign in and can find other users through swipe.
- Swipe Feature only shows you the opposite gender users profiles.
- Implemented features such as chat, video calling, audio calling in it.
- Used Agora for video calling and audio calling feature.
- Used firebase for authentication user can sign in and create their profiles.
- Used all the rest API's and used redux for the state management.
- Social integration is implemented.

T&P Shield

How it Works -:

T&P Shield acts as a shield between your financial accounts and any type of business payments. In today's environment, we give out our personal checking account and debit/credit card numbers often. This makes us vulnerable to fraudulent attacks.

Details -: Virtual/Physical Credit & Debit card Application which allows you to create

private accounts. Virtual card numbers can then be provided for financial transactions instead of personal debit/credit cards.
