## SKILLS

---

- **Programming Languages** - Javascript, Python, Typescript, HTML, CSS
- **Libraries/Frameworks** - React, NextJS Redux, Redux-Saga, NodeJS, Express, Material UI, GraphQL
- **Tools / Platforms** - Git, Jira, Confluence, Postman

## EXPERIENCE

---

### Skids Health

Gurugram, India

*SDE-II (Founding Engineer)*

02/2023-01/2024

- Nurtured a **robust partnership with the CTO**, ensuring a continuous and comprehensive discourse on product development advancements and indispensable specifications, aligning strategic visions for successful outcomes.
- Showcased adept proficiency in **React** for front-end development, integrating advanced state management through **Redux** and **Redux-Saga**, crafting refined user interfaces using **Material UI**, and implementing **AWS Amplify** to ensure seamless and secure authentication functionalities and seamlessly integrated **GraphQL** APIs for optimized user experiences and robust system reliability.
- Led the creation and delivery of **five innovative products**, adhering to industry standards, meeting deadlines, and **adapting** to user preferences. Utilized **planning** and cohesive **teamwork** for successful, **user-focused outcomes** aligned with project goals.
- **Managed and mentored the frontend team**, leveraging **strong leadership skills** to foster an environment that nurtured innovation, encouraged collaboration, and enhanced **productivity**, resulting in a dynamic and creative work atmosphere.

### Mckinley Rice

Noida, India

*Associate Software Developer*

01/2022-02/2023

- Played an instrumental role in the project's front-end development, employing **React** to craft an intuitive user interface seamlessly integrated with **Flask** for the robust backend, ensuring a cohesive system architecture and user-centric functionality.
- Innovatively engineered a feature, conceptualizing its inception and meticulously overseeing its implementation, **allowing users to receive scheduled email notifications with personalized data at user-defined intervals, significantly enhancing user engagement and customization options.**
- Led a comprehensive overhaul of the entire dashboard interface, employing a keen eye for contemporary **design principles** to elevate its visual appeal and **user-friendliness**, resulting in a more **engaging and efficient user experience.**
- Stepped into additional **backend responsibilities** during a shortage of backend developers, adeptly supplementing the team's capacity and ensuring uninterrupted project progress, exemplifying **adaptability** and **commitment** to project success.

### Cognizant Technology Solutions

*Programmer Analyst Trainee*

04/2021-01/2022

- Pursued training in diverse technological domains to expand and enhance my skill set.
- Successfully conceptualized and developed an **E-Learning App**, facilitating student enrollment in a wide array of courses while enabling educators to effortlessly publish their educational content.
- Designed and engineered the E-Learning App using a comprehensive technology stack, including **AngularJS** for the front-end, **ASP.net WebAPI** for the back-end, and **MySQL** as the database management system to efficiently store and manage data

## EDUCATION

---

### Dr. APJ Abdul Kalam Technical University, Uttar Pradesh

*Bachelor of Technology*

2017-2021

## ADDITIONAL SKILLS

---

- **Interpersonal Skills** - Quick Learner, Teamwork, Dependability, Adaptability
- **Hobbies** - Adventure Sports, Travelling, Photography, Gaming
