PROJECTS

<https://rohitth.ccbp.tech>

Conference Website

Technologies used : HTML, CSS, Bootstrap

Developed an informative website presenting key data about a conference, such as participant numbers, workshops, distinguished speakers, countries in attendance, and an event summary video.

- Designed a mobile-responsive interface using diverse HTML components and CSS3 styling techniques like background, flex, and CSS box model properties.
- Added conference video content through Bootstrap's embed functionality.

Generative AI

<https://rohittavva.ccbp.tech/>

Technologies used : HTML, CSS, JavaScript, Gradio, ML creation generative AI by using Gradio, Hugging Face, LLM

Generative AI is an application that gives the response according to the user input. Where it takes output from OpenAI platform and processes the data and gives the input. JavaScript is used to get the response from the backend and Gradio and Hugging Face used to deploy the model on the web page and ML used for algorithms for processing the data.

CERTIFICATIONS

- Google Cloud** : It's all about the storing the data in the cloud and managing and accessing instances and Kubernetes and cloud data
- GIT** : This Certification regarding the how GIT is useful for the industry experts and how the data is being processed in the GIT and knowing the how we can process the data in the git.
-

ACHIEVEMENTS

- APSCHE QUIZ** : The quiz was conducted throughout the Andhra Pradesh in which I was represented from my college and participated up to level-2 which was held at Vijayawada
- FLY HIGH CHALLENGE** : This was a challenge organised by a NXTWAVE an educational platform throughout India which selects the students to send Dubai for 4.0 tech camp organised by NXTWAVE. I was one of the members who went to Dubai for tech camp.
-
