## Software Development Engineer-1

### **Tanla Platforms Limited**

📋 September 2021 – Present

Hyderabad

### Wisely-Communicate

- Part of Platform Stabilization Portal hygiene team for improving efficiency and cost-cutting across the Application.
- Implemented internationalization across the Application as part of business expansion to other countries.
- Part of Security VAPT (Vulnerability Assessment and Penetration Testing) Dev team, where we had implemented optimized ways to remove vulnerabilities across Application.
- Part of RBAC (Role-based access control) team for restricting network access based on the roles of individual users.
- Ownership of Admin Portal of Application from Vuejs end.

#### Wisely-ATP

 Developed RBAC (Role-based access control) and Authentication for the portal from scratch without using 3rd party services or Open source products which helped in effective cost-cutting.

#### Wisely-OTT

- Implemented Keycloak(open source software product to allow identity and access management) authentication and authorization for the portal which helped in cutting the cost of 30-40 lac per month which was being given to 3rd party.
- Developed RBAC (Role-based access control) for the portal using the AuthorizationPermissions-Policies provided by Keycloak.
- Coding standards along with SonarQube (code quality check) and Trivy (security scanner) checks were made.
- Involved in continuous discussion with Business team and QA team for getting more insights and streamlining the development.

# Assistant System Engineer

#### **TCS (Tata Consultancy Services)**
