EXPERIENCE

Bookanartist— Web Developer
Jun 2021 – Current

- Developed and implemented a personalized and customizable link-in-bio solution, akin to Linktree, named "BookTree" using NextJs, facilitating streamlined sharing of essential links across various social media platforms.
- Collaborated with design team to deliver high-quality user experiences, seamlessly translating wireframes and mockups into visually appealing, responsive, and cross-browser compatible interfaces that met business requirements
- Integrated frontend code seamlessly with backend APIs to ensure data consistency, smooth application functionality, and optimal user experiences.
- Transformed Mobile Application mockups into fully functional and visually appealing user interfaces, ensuring a seamless and engaging user experience.
- Achieved 25% faster page load times by optimizing images and implementing minification. Established a reusable UI component library for efficient development and project-wide consistency
- Managed and maintained WordPress installations for multiple blogs, ensuring uptime, security, and optimal performance
- Conducted in-depth research on competitors' products, including features, pricing, user experience, and marketing strategies and developed detailed reports and presentations summarizing research findings and making recommendations for product enhancements and new features

Tools/Technologies – JavaScript, ReactJS, NextJS, React-Native, Redux, NodeJS, Webpack, SQL, HTML, CSS, Ant Design, WordPress, Figma, Adobe XD

Infratech— Web Developer
Jan 2021 – Jun 2021

- Proficiently redesigned and developed company websites, enhancing both aesthetics and functionality. Additionally, created a secure CRM system that streamlined the process of exporting daily website inquiries with a one-click action, ensuring efficient management and data security.
- Led the creation of websites, landing pages, email templates, and a robust dashboard to streamline customer and client interactions.
- Showcased expertise in optimizing website performance, effective web hosting management, and implementing SEO strategies to boost online visibility and engagement.

Tools/Technologies – JavaScript, HTML, CSS, Bootstrap, MySQL, PHP, Figma

APL, Mumbai — Support Associate
May 2017 - July 2017

- Integral member of a 25 persons team responsible for acquiring and processing GST data for clients, which included meticulous verification and input into their ERP system.
- Successfully verified and processed a substantial dataset of over 300k+ users, ensuring data accuracy and completeness.
- Collated daily data from fellow team members, applied data quality rules, and meticulously forwarded the organized data to the head office.
- Actively contributed to website quality assurance by identifying and reporting bugs to the development team, ensuring optimal functionality and user experience.

ACADEMIC QUALIFICATION

Examination	Year	Board/University	Percentage/C GPA
BE in IT (Information Technology)	2021	University of Mumbai (Thakur College of Engineering & Technology)	7.99 CGPI
HSC	2017	Maharashtra State Board	63.38%
SSC	2015	Maharashtra State Board	81.60%

TECHNICAL SKILLS

- Skilled in ReactJS, NextJS, React Native, Redux, NodeJS, and Webpack for building interactive and performant frontend components.
- Web development with JavaScript, HTML, CSS, Bootstrap, UI Kit, Tailwind CSS, Ant Design, PHP
- Proficiency in MySQL and SQL
- UI design tools such as Figma, Adobe XD
- WordPress
- Working Commands of JAVA Programming Language

Projects

Portfolio V2
Dec 2023 - Jan 2024

Developed a second version of a personal portfolio using Next.js and Tailwind CSS. The platform serves as a comprehensive showcase for highlighting skills, work experience, and various projects. Sole developer responsible for the design, implementation, maintenance and deployment of the portfolio.

Tools/Technologies – JavaScript, NextJS, NodeJS, Tailwind CSS, HTML, CSS, Github, Vercel

Invoice Generator
Nov 2023 - Dec 2023

Invoice Generator Website: Built with React.js and webpack, this tool simplifies invoice creation, preview, download, and email sending. The dynamic UI ensures an intuitive experience, while webpack optimizes bundling. Leveraging Bravo library enhances email functionality for a comprehensive invoicing solution.

Tools/Technologies – JavaScript, ReactJS, Webpack, NodeJS, ExpressJS, HTML, CSS, Github, Vercel, Bravo

App Usage Visualizer
Nov 2023 - Dec 2023

Developed a dynamic React application that serves as an intuitive app usage visualizer. The app utilizes JSON data containing on and off times throughout the day for various applications. The centerpiece is a donut graph, representing a 24-hour clock, where each application's usage is depicted by colored areas based on its active periods. Users can easily switch between different apps using a dropdown menu, gaining insights into their usage patterns over time.

Tools/Technologies – JavaScript, ReactJS, NodeJS, HTML, CSS, Github

Certificate

- Webpack 5 in 2023: The Complete Guide For Beginners   Feb 2024
