Technical languages-C#, Java, Typescript, Javascript, HTML, GoLang.

Mobility- Native android and Hybrid Mobile Apps

Web frameworks- Vue.js, Angular 10 , AngularJS-1.x , JQuery

IDEs -VS 2019/2022, VS code, Eclipse Juno

ORMs-Lightspeed , Entity Frameworks.(LINQ and Query Expressions)

B.Tech(CSE)- **GLNAIT,** Mathura, UP

2008 - 2012

GLNAIT is an engineering institute affiliated to UPTU, Lucknow

Percentage scored: 66.38

XII CBSE board exam- **SFS ,** Hathras, UP

Year of Passing -2007

Percentage scored: 83

X CBSE board exam- **SFS ,** Hathras, UP

Year of Passing -2005

Percentage scored: 84.2

PROJECTS Done:
A Healthcare Domain Company | *Client – USA based*
work period : March 2022 – Present

**Project is about migrating the existing monolith MVC based project
 to distributed and scalable microservices in backend using .Net Core 3/
.Net6/7 and Vue.Js, Typescript, HTML, CSS etc based component based frontend/UI.**

My job as a Staff Engineer is to refine Product backlog Items , do peer code reviews ,
Agile and TDD based Legacy app modernization using Dotnet Core 3.x/ .Net 6/7 based Microservices and frontend
in HTML/ Vue.Js etc

A Sea water treatment Company | *Client – UK based MNC*
work period : Jan 2020 – July 2021

**Project is about building a website in Dotnet core 3.1 APIs
using Code First Approach for backend based on
Entity Framework Core and Angular 10 for UI to provide
drinking water facilities to direct users and other small**

business companies of the same domain.

My job as a Technical Analyst is to refine PBIs , do peer code reviews ,
write dot net core APIs , unit tests , integration tests, create CI/CD
pipelines in Azure.
**Major implementations - Ocelot API gateway, CQRS/Mediator pattern, Fluent APIs, Automapper, JWT
Authentication**
Sharepoint related APIs, Email Service etc, Database decoupling etc.

A Staffing agency | *Client - US based MNC*
work period : May 2019 -Dec 2020

**It is a responsive web app via which colleagues help
candidates in their career transition and training and
placements.**

My job as a Technical Analyst was to refine PBIs , Do peer code reviews ,
end to end Application development using AngularJS, MVC 5 ,
Bootstrap,HTML, SQL, LINQ.

HH3 | *Client -ScandiHealth | work period :oct 2014 -dec 2016*

**It was both a desktop web app and native android mobile
app which caters to the need of Danish senior citizens
for availing medical services.**

My job as an Associate Product Developer-to look after the maintenance
and feature implementation of the
Android Mobile app and MVC Web app.

Worked on MVC 3.5 with razor views for online modules using C# and
javascript/JQuery.

Worked on Core Java for android mobile app offline modules and SQLite
DB.

Specific and challenging work done by me was version upgrade and app
download functionality using QR code scanning.

VitaeGo | *Client- ScandiHealth and Gothenburg |work period:
jan 2016-dec 2016*

**It was a hybrid mobile web app version of the above HH3
native android app.It caters to needs of Swedish/Danish
People for availing medical facilities.**

My job as an Associate Product Developer -to look after the development and maintenance of the App.

Developed UI using angularJS and html and css and used already available WCF services for backend data.

Worked on SQLite DB.

Simple| *A US based global Bank | work period: march 2013-Aug 2013*

This project was from an australian bank looking after the maintenance of tenants, customers and other resources of the bank.

My job as a junior S/W Engineer -to write business logic as REST APIs using C#.

Worked on LINQ and query expression using Lightspeed ORM to query the database. worked on SQL server 2008R2.

Atex | *Client Atex USA | work period: sept 2013-June 2014*

This was an advertising(print/electronic/on air) project from Atex group ltd.

My as a junior S/W Engineer -To write WCF services in C#

MS-CRM Dynamics 365 | *Client Microsoft | work period: june 2017-Dec 2017*

It was a Customer relationship management product from microsoft just like SAP

My job as a senior S/W engineer -to develop the front end using typescript and AngularJS.

Major work done by me was the Implementation of the undo-redo functionality/service implementation for the dashboard.

LogRhythm | *US Security Domain project | work period: Jan 2018-April 2019*

It is a security software to protect systems from malware and suspicious intrusion by generating alarms and notifying the end user and taking smart responses wherever possible automatically.

My job as a senior S/W engineer -to look after the maintenance and feature development of windows services for AD sync,scheduled report generation, alarms and alarms response functionality.

And in parallel development of RESTful APIs in Dotnet Core 2.0.
