Experience

Junglee Games │SDE I Full Stack Developer March 2022 - Present

Middleware Microservice Architecture:
- Architected a robust middleware microservice integrated with two different third-party SMS providers like Times Internet.
- Ensured reliable, cost-efficient delivery of 150K req/min promotional and transactional messages, achieving low latency of 30ms.
- Contributed to various microservices, specializing in opt-in services and leaderboard functionality.

Scalable Subscription Module:
- Developed different dynamic subscription module for Junglee Rummy, empowering users to multiple premium features.
- Engineered optimizations, driving a remarkable adoption rate of over 12% among active users.

Homepage Optimization and UI/UX:
- Collaborated in a tech team that optimized Junglee Rummy and Howzat homepages, increasing SEO score from 56 to 88+.
- Revitalized UI/UX, resulting in a twofold increase in organic user engagement and a substantial boost in conversion rates in Howzat.

Cross-functional Collaboration and Promotions:
- Worked closely with cross-functional teams (Product, Design, Marketing, Retention & Growth).
- Contributed to shaping the strategic blueprint for IPL 2023 promotions, resulting in an outstanding 59% revenue growth compared to the previous quarter.

Technologies Used:
- Spring Boot, Angular, React, SQL, PSQL, Java, HTML, CSS, and Javascript.

Scienaptic Systems │Full Stack Developer September 2020 - March 2022

Full-Stack Web App Development for Citi Bank-US:
- Led the development of a full-stack web app for Citi Bank-US, collaborating with the lead architect and product manager and DS team to target a 3x increase in card business.

UI Design and Data Visualization:
- Crafted a user-centric UI. Implemented multiple REST APIs for seamless UI-backend integration.
- Managed user authentication, registration, and role-based access controls.

Performance Optimization:
- Enhanced the Umbrella Vault Application, achieving a remarkable API response time of 110ms.
- Identified and optimized areas for improvement, including database queries, caching and server performance, resulting in a 30% reduction in response time

Technologies Used:
- Spring Boot, Angular, SQL, Java, HTML, CSS, and Javascript.

Internship and Certifications

Newton School │Newton School Coding Boot Camp (Internship) April 2020 - September 2020
- Full Stack Web Development along with Problem Solving.
- Technical Stack learnt: Node JS, React JS, Express JS, Mongo DB, HTML, CSS, JavaScript and Bootstrap.
- Participated in various 10+ Coding contest and created projects from scratch like Quiz App, Authentication System.

Algo Expert │DSA, Computer Fundamentals and Sytem Expert
- Completed more than 110 questions in AlgoExpert.io.
- Strengthen architectural knowledge on System Design Fundamentals.

Projects

Resume Builder Application │Zivafy
- It helps creating well organized resume featuring more than 8 different templates and sample helps.
- Role: Developer | Designed and Built entire backened & UI, integrated UI with RESTApi's.
- Tech Stack: React, Spring Boot, SQL.

Skills

Computer languages: Java, CSS, HTML, Javascript
Software Packages: Spring Boot, AngularJS & React
Additional Courses Taken: Data Structures and Algorithms, System Design, OOPS, DBMS

Co-Curricular Activities

- **Interest:** Tech | Cricket | Trading
- National level Taekwondo player, silver medalist in year 2013 by TFI (Taekwondo Federation of India).
