WORK EXPERIENCE

Senior Software Engineer
Hyno ↗

07/2023 - Ongoing   *Remote, India*
Hire pre-vetted senior remote developers in less than 2 weeks

Achievements/Tasks
- Developed several critical APIs for Forta Health, enhancing system functionality and user interaction
- Added feature to link skill acquisition goals with behaviour reduction goals and improved unit test coverage by 20%
- Refactored the entity overlap logic which was business critical and helped fix a lot of user issues related to time overlap with other events

Software Engineer - Backend
Nas Company ↗

01/2021 - 02/2023   *Remote, India*
nas.io - Bring People Together

Achievements/Tasks
- Built a customizable video-on-demand solution using AWS cloud formation template supporting adaptive streaming
- Integrated Paypal, BitPay, and Xendit as payment methods respectively in local & international markets and backend APIs including In-App Subscriptions for app and play store
- Refactored signup and enrolment APIs to improve latency by ~33% and 75% respectively to decrease drop-off rates while signup; Tech stack used: NodeJS, ExpressJS, Python, MongoDB, React, NextJS
- Increased the number of users from 2K users to 500K users over a span of 2 years by building multiple systems (reaction, comment, etc) and working on optimisations focussed on user growth

Full Stack Developer
ThoughtFlow ↗

08/2019 - 05/2020   *Hyderabad, India*
Mindmaps with the mojo of Spreadsheets

Achievements/Tasks
- Rendered responsive UI using Angular
- Maintained MongoDB database, automated backup and restore scripts to and from AWS S3 cluster
- Used Loopback (BaaS) for creating remote methods, integrated Stripe Payment Interface, JIRA API, and social login; Other Tech stack used: NodeJS, ExpressJS, Python, MongoDB

Assistant System Engineer - Trainee
Tata Consultancy Services ↗

07/2018 - 08/2019   *Hyderabad, India*

Achievements/Tasks
- Wrote logic to compare xml documents using JAXB parser, working on Maven and Spring Boot
- Built MEAN SPA kibana logger app to fetch logs based on certain parameters and group them by a given parameter; Other Tech stack used: NodeJS, ExpressJS, Python, MongoDB
- Provided tech support for BT project

SKILLS

`Data Structures and Algorithms`

`Distributed Systems Design` `MongoDB` `ExpressJS`
