PERSONAL DETAILS

- Total Experience   2 Years 2 Months
- Current Location   Bengaluru
- Date of Birth   Aug 10, 2000
- Gender   Male

SKILLS

- API Design And Development
- API Testing
- Unit Testing
- Integration Testing
- Frontend Development
- Backend Development
- Continuous Integration / Deployment
- Workflow Automation

TECHNICAL SKILLS

- Java
- Spring Boot
- Spring Data JPA
- Mockito
- React.Js
- Nextjs
- TypeScript
- Javascript
- Jest
- Docker
- Rabbitmq
- Camunda BPM
- Done CI
- Github Actions
- Openshift Platform
- Sonarqube
- Artifactory
- Design Patterns
- MySQL
- Git

PROFILE SUMMARY

Results-oriented Backend Engineer with 2+ years of experience in designing, developing, and optimizing complex software solutions. Proficient in industry-leading technologies such as Java, Spring Boot, RabbitMQ, and more. Known for my ability to translate client requirements into robust, scalable, and high-performance systems. Passionate about innovation, I thrive on the challenge of implementing cutting-edge technologies to drive product excellence. A collaborative team player dedicated to continuous learning and improvement, I excel in fast-paced environments where creativity and problem-solving skills are valued.

EDUCATION HISTORY

Graduation

Course	B.Tech/B.E.(Computers)
College	SRM Institute of Science and Technology
Year of Passing	2022
Grade	9.5/10

WORK EXPERIENCE

Sep 2023 to Present

Senior Systems Engineer at Infosys

As the result of Danske Bank's (Previous Employer) strategical decisions, I was transitioned from a Backend Engineer role to join Infosys, evolving into a Full Stack Developer. Played a key role in developing a portal for Danske Bank vendors, facilitating seamless creation of sales cases and providing an interface for real-time updates on case statuses. Contributed to developing an operational platform with Camunda and RabbitMQ, managing diverse workflows across the customer journey. Assessed and remediated vulnerabilities associated with the framework utilized in applications. Optimized CI/CD processes to reduce human errors and enhance efficiency.

Jan 2022 to Aug 2023

Associate Software Engineer at Danske IT

Elevated API scores to align with the latest industry standards. Successfully incorporated Terraform into applications to automate the provisioning of cloud

resources across various environments. Developed a Docker image in-house capable of executing Postman Collections, enabling the implementation of automated API testing through scheduled cron jobs. Designed and upheld both backend and frontend components for Danske Bank's End User Portal across Denmark, Finland, and Sweden. Guaranteed optimal code quality metrics by minimizing vulnerability counts, implementing comprehensive unit tests and API tests, and automating them in the pipeline. Utilized monitoring tools such as SonarQube, Blackduck, and Twistlock to ensure continuous oversight. Conducted root cause analysis to identify and provide resolutions for production issues, addressing ServiceNow incidents reported by customers in a timely manner.

LIVE WEBSITES

Portfolio Website

URL: https://prateek00712.netlify.app/
Developed a dynamic and visually appealing portfolio website using React, showcasing my full-stack development skills where you'll get to know more about me, my achievement, hobbies, skills etc...

Fitness Arenaa - Gym Website

URL: https://fitness-arenaa.vercel.app/
Engineered a sleek and efficient website using Next.js, capitalizing on its intuitive routing and state management features to deliver a seamless user experience.
