SUMMARY

I am an Experienced Software Engineer with a demonstrated history of excelling in the internet industry who comes with a B.Tech. in IT. I have a good nick for figuring out solutions to a wide variety of business and technical problems, and a good history of driving their solutions to completion, either in individual capacity or while leading a team of engineers, and mentoring the team while working with them.

I am Fairly Proficient with Architecting complex engineering systems, System Design, Distributed Systems, Microservices Architecture, Data Structures, Algorithms, various Relational/NoSQL DBs, with great knowledge on how to develop/use these securely.

I have good experience in designing systems from scratch, scaling existing systems, driving teams towards high-quality development and mentoring other engineers.

EXPERIENCE

Associate Vice President   01/2015 - Present
J P Morgan

- Worked on Corporate Action rewrite and was instrumental for decommissioning a 20 year old legacy app.
- Core member on in house ESB,a rewrite legacy messaging application using open source technologies and concepts such as microservice principles.
- Worked on GUI based CLI to generate kubernetes configuration.
- Developed a test harness to kick start and help QA.
- Involved in design discussion and providing input/guidance in design.
- CICD Pipeline and automated deployment.
- Mentoring other members.
- Technology Stack - Java 8, Kubernetes, AWS, Spring Boot, IBM MQ, Oracle DB, Asynchronous Processing.

SSE   09/2013 - 01/2015
BNP Paribas

- Individual contributor.
- Part of the design team responsible for parts of Murex, vendor product.
- Analyzed apps developed around vendor products, rewrote.
- DTCC settlement module.
- DB Migration
- Technology Stack - Java 5, Spring, Hibernate, EJB (MDB), Weblogic App Server

Associate   04/2010 - 09/2013
Polaris Financial Technology limited

- Started as SE promoted to SSE
- Was a key team player considering design and development.
- Had developed idle timeout saving DB hit.
- Developed ANT scripts to build and deployment onto App Servers.

SE 01/2008 - 04/2010
Odisys Technologies
- Had opportunity working on server Framework Apache MINA

E D U C A T I O N

Information technology 2006
BPUT - B.Tech
Excellent at comradery, Team captain, led events.
