Worked on developing JioMart Partner App - part of Jio New
Commerce Business vertical - which is a B2B business app that
helps merchants buy products in wholesale for retail.

This increased the feasibility for merchants to leverage coupons
within the Jiomart Partner App, resulting in a notable rise in sales
and a substantial increase in the number of recurring merchants.

- Implemented responsive design techniques for optimal user experience.
- Developed and maintained features with clean, maintainable code using React, Nextjs, JS, and TS.
- Utilized Azure for version control and collaboration with team members.
- Worked on CI/CD pipelines to automate the build, test, and deployment processes.
- Conducted unit testing and ensured adherence to clean code practices.
- Removed code smells and improved code quality.
- Increased test coverage to ensure robustness.
- Received recognition and appreciation in retrospective calls.
- Acquired knowledge of server-level architecture and deployment processes.

Cognizant Technology Solutions - Travelers | Programmer   February 2020 - September 2021
Have developed the dashboard for the company enhancing the seamless experience for their customers , increasing the overall sales of their product .
- Trained in Java , maven , Selenium.
- Responsible for handling clients - **Travelers** and delivering projects for an entire team
- Tested the features with Selenium using Java
- Have also built features using Reactjs , HTML , CSS and Js.
- Delivered the features for the client along onsite employees
- Awarded with The Best GENC Associate award.
