Summary

Software Developer with a passion for creating innovative solutions and a unique background in Law.

Leveraging my determination and adaptability, I successfully transitioned from Law to IT, demonstrating my ability to embrace new challenges and excel in a fast-paced industry. Within just two months of dedicated study, I secured my first job in IT, showcasing my aptitude for quick learning.

I have 3 years of experience developing user-friendly dashboards and websites for diverse industries. I bring a blend of technical expertise and analytical thinking to my work.

Self-motivated, adept at acquiring new skills through self-study. Strong problem-solving abilities with a focus on performance optimization.

Experience

Software Engineer
NTT DATA Europe & Latam
Dec 2021 - Present
Developed and maintained a dynamic dashboard for agriculture companies, enabling them to access real-time alerts and property data.

- Implemented new features and resolved bugs, ensuring optimal performance and user experience.
- Utilized apexcharts for data visualization and openlayers for map creation, enhancing the visual representation of information.
- Designed and implemented a micro frontend architecture, resulting in improved performance and efficient collaboration between teams.
- Created a comprehensive UI library, establishing a consistent style pattern across the organization and providing reusable UI elements for multiple projects.

• Utilized Storybook to showcase UI elements and facilitate comprehensive testing of the style guide.

Software Developer
Webjump
Sep 2021 - Dec 2021
Contributed to the development of a dashboard for sellers of a major company, enhancing their sales consulting experience.

• Implemented new features and resolved bugs in a React project, ensuring seamless functionality.
• Developed an e-commerce platform for a leading food industry company using CMS Magento (Adobe Commerce).

Frontend Developer
DOK Despachante
Jun 2021 - Sep 2021
Built landing pages for the institutional website of a small car industry company.

• Leveraged Laravel and jQuery frameworks to create new landing pages, improving the online presence and user engagement.

Frontend Developer
KUPON GO
May 2021 - Sep 2021
• Developed a visually captivating landing page to showcase new features and attract potential clients.
• Enhanced the existing client dashboard by implementing new features and resolving any identified issues, ensuring optimal functionality and usability.

Education

Universidade Candido Mendes
Specialist, Tax Law/Taxation 2017 - 2019

Universidade Veiga de Almeida
Bachelor's degree, Law
2012 - 2017
