PROJECTS

MYNTRA CLONE SITE | React.js, Redux, JSX(Javascript + XML), CSS-Bootstrap, HTML
https://naman-myntra-clone-static.netlify.app/
Developed a interactive web application using React. Leveraged JSX (JavaScript XML) for seamless integration of HTML-like syntax within JavaScript. Implemented Redux, a state management library, to effectively manage application state and ensure consistency across components. Utilized HTML for structuring the content and markup, and CSS for styling and visual enhancements, adhering to web development best practices.

GYMGUIDE - A FITNESS WEBSITE | React.js, Node.js, Express.js, MongoDb, JSX, CSS, HTML
https://gym-guide-project.netlify.app
Home workout for an individual for a healthy and happy life. It allows to maintain fitness using a collection of over 100 exercises which involves equipment as well as freely. It first ask to log you In then keep track about your history. It invovles use of many APIs. We can Select different body parts for specific workout

SUNDOWN STUDIO- STUDIO OF ANIMATION | Javascript, CSS, HTML
https://266109.github.io/Animated-Website-/
Built a captivating animated website showcasing the power of HTML, CSS, and JavaScript. Leveraged libraries like Locomotive.js and Swiper.js to craft seamless scrolling experiences, interactive elements, and dynamic transitions. Project highlights includes smooth parallax scrolling, user-friendly slider interactions, complex animations, resulting in an engaging and immersive user experience.

PORTFOLIO WEBSITE | Javascript, CSS, HTML, Tailwind
Build a stunning and responsive personal portfolio website to showcase your skills, projects, and achievements. This portfolio will serve as a professional online presence, allowing you to highlight your expertise and attract potential employers, clients, or collaborators.
