EDUCATION

2012 - 2016
MSIT - GGSIPU

- B.Tech CSE

SKILLS

- React Native / React
- Typescript
- Redux
- Rest Api
- Git
- Firebase
- Critical Thinking

LANGUAGES

- English (Fluent)
- Hindi (Fluent)

PROFILE

Software Engineer with over 7+ years of experience building mobile and web applications using React and React Native.

WORK EXPERIENCE

Loop Health - SDE 3   SEP 2022 - PRESENT

- Revamped the native iOS and Android app to the React Native platform, resulting in improved performance and a more seamless user experience.
- Introduced the Hackathon project "Stepathon" for an inter-company fitness challenge, which has recently gone live.
- Developed and owned the front end for the medi-claims tracking flow in the app, eliminating the need for manual tracking and improving efficiency.
- Improved overall app performance by debugging memory leaks and optimizing the user interface.
- Set up analytics and plotline to track user behavior and make data-driven improvements.
- Worked directly with customers to understand pain points and gather feedback for continuous improvement.

Walmart Labs India (Mexico) - SDE 3   JUN 2020 - SEP 2022

- Boosted customer acquisitions by 159% through front-end development of Express membership.
- Achieved a 90% reduction in customer care calls by collaborating on the Order Return, Refund, and Cancellation flow.
- Enhanced user experience by revamping the Order History feature and integrating Order Tracking.
- Improved collaboration and efficiency by contributing to the development of a mono repo uniting multiple banners.
- Played a key role in end-to-end design and deployment across Returns and Refunds.

Travenues (ixigo.com) -SSD   MAY 2018 - JUN 2020

Worked as a Senior Software Developer at Travenues (ixigo.com), focusing on special projects:

- Contributed to the end-to-end development of the Spicejet mobile and web application, including features such as Flight status, addons, user profile, leg/sector selection management, web check-in, and payments.
- Owned various parts of the application, ensuring smooth user experiences and efficient functionality.

MetricStream - MTS   SEP 2016 - MAY 2018

Started my career as a react-native developer building UI libraries from scratch.
Building dynamically developed screens for different clients.
Built a system to be able to deliver customized applications to multiple clients in a short period.
