Work Experience

Senior Frontend Engineer

Apr, 2019 - Present (5 years +) | GoZayaan

Our team made traveling easy for almost anyone capable of browsing internet by developing gozayaan.com where I have:

- Developed and maintained GoZayaan's official website using Vue.js.
- Created the website from scratch to meet feature requirements, serving 200K users.
- Integrated payment gateways, including banks and mobile options.
- Developed internal admin panels using Vue.js, utilized by 150 employees daily.
- Mentored developers, conducted code reviews, and led a team of 5.

Worked with: Vue.js, Vue 3, JavaScript, SASS, LESS, HTML, CSS.

Frontend Developer

Jul, 2017 - Mar, 2019 (1 year, 9 months) | Flow Digital Ltd.

As part of my responsibilities as a Frontend Developer, I have:

- Developed frontend for web applications as per design and client requirements (Al Tayer Motors | UAE).
- Improved user accessibility of current frontend interfaces.
- Collaborated with backend developers to integrated APIs to interact with server end.
- Fixed bugs and provided maintenance support to clients.

Worked with: Vue.js, jQuery, JavaScript, LESS, HTML, CSS.

Frontend Developer

Nov, 2016 - May, 2017 (7 months) | Codeboxr

As a Frontend Developer at Codeboxr I have:

- Developed frontend themes for the company to be sold on marketplaces.
- Converted designed themes to pixel perfect frontend webpages.
- Wrote and validated codes according to marketplace standards.
- Written documentation for the themes.

Worked with: jQuery, JavaScript, LESS, HTML, CSS.

Skills

- Language and Frameworks: JavaScript (ES6+), Vue.js, Vuex, Pinia, Svelte, Bootstrap, SASS, LESS, Stylus, HTML5, CSS3
- Version Control: Git, Github, Gitlab, Mercurial
- Build Tools: Webpack, Vite, Gulp, Grunt
- Responsive Design and Cross-Browser Compatibility
- RESTful APIs, AJAX and WebSocket

Projects

Kanban Task Management App

https://github.com/towkir/kanban-task-management-web-app

This is a frontend only kanban task management app that uses localstorage to store tasks data, has boards, columns, tasks management, theme toggle, drag and drop feature and many more.
Live at: https://kanban-task-management-by-towkir.netlify.app/
Tools and Tech: Vue.js, Vuex, SASS.

Product Feedback App

https://github.com/towkir/product-feedback-app

With this app, you can collect suggestions on your product and pick them up to plan a development roadmap. Upvote or downvote a feedback or suggestion, filter them as per your needs. Changes are not persisted to localstorage though.
Live at: https://product-feedback-app-swart.vercel.app/
Tools and Tech: Sveltekit, Stylus.

Pomodoro App

https://github.com/towkir/pomodoro-app

This cool looking pomodoro app has options to set your preferred duration for pomodoro, short break and long break modes, has multiple color schemes and fonts.
Live at: https://pomodoro-app-towkir.vercel.app/
Tools and Tech: Vue 3, Pinia, SCSS.
