## Experience

**Jul 2023 – Present**  📍 Remote
Software Engineer
**Stealth Startup**

Web App Development.
• Implemented micro front-end architecture at a startup, working with a small team. Reviewed code, set up best practices, and created fast and innovative UIs. Fixed important issues for a stable product and collaborated with the DevOps team for smooth deployments and domain setups.

**Jan 2023 – June 2023**  📍 Remote
SDE 2
**SaasPay**

Web App Development.
• Developed web applications using Next.js, following Atomic Design principles with data visualization and user-friendly interfaces
• Led the creation of RFCs (Request for Comments) and diligently documented the entire development process, ensuring clear communication and knowledge sharing within the team.

**Oct 2021 – Jan 2023**  📍 Remote
Software Engineer – UI UX
**Trinkerr**

Mobile App Development –
• Made significant contributions to the redevelopment of a mobile app from scratch.
• Created complex social features using React Native, including feed management and post creation, real-time data connections using socket, etc.

Design System and UI Enhancements –
• Developed a multi-theme supported Design System.
• Implemented a token system using styled-system for rapid development.
• Created smooth animations and continuously improved UI.

Web App & Website Development –
• Developed UI for key features of a Web App within tight deadlines.
• Implemented custom theming in MUI for enhanced user experience.
• Designed and built a marketing site using Next.js with SEO best practices, resulting in a significant increase in organic traffic.

**Nov 2020 – Oct 2021**  📍 Remote
Teaching Assistant
**NeogCamp**

Student Support and Mentorship –
• Provided regular assistance to students, actively resolving their doubts and queries.
• Conducted thorough code reviews for students, offering feedback to improve their coding practices.
• Educated non-computer science team members on various computer science concepts.

**Sep 2020 – Nov 2020**  📍 Remote
Front-end Developer
**TestBuzz**

Product Development –
• Developed key screens of the product according to provided designs, ensuring accurate implementation.
• Added expected functionalities to enhance the user experience and meet project requirements.
