AWARDS & RECOGNITIONS

Employee of Month

Hasher of Month | Top Impactor **(2)**

Got appreciation from **VP of Engineering** and **VP of Product** for quick user resolutions over different media channels.

Got appreciation from **Senior Product Designer** for effective suggestions during design handovers.

EXPERIENCE

Software Development Engineer (SDE) 2 | Virtual Internships   *Dec'22 - present*
Providing guaranteed remote global internships to any student anywhere in the world

Customer Web Platform
Spearheaded the development of a web application from inception, facilitating intelligent and swift matches between 25,000 students and over 3,000 companies.
- ❖ Executed end-to-end modules for both company and student journeys, encompassing job board functionalities, applicant tracking systems, internship applications, profile management, placement tracking, and internship oversight, resulting in a 40% increase in student engagement and a 25% boost in company recruitment efficiency.
- ❖ Took on the role of lead frontend engineer, overseeing the development process for 3 engineers.
- ❖ Implemented optimizations to enhance application performance, ensuring fast load times and optimal responsiveness.

Tech stack: React, Javascript, Typescript, RTK (React Query), CSS, SASS, Node js, MixPanel

Internal User Platform (Moo)
Engineered and deployed *a CRM portal from scratch for the internal operations team, enabling efficient management of over 3000 companies and 25,000 students.*
- ❖ Created specialized modules empowering operations teams to facilitate company hiring processes, ensuring the selection and management of the most suitable interns.
- ❖ Additionally, developed features to provide interns with personalized profile reviews and guidance.
- ❖ Collaborated closely with UX/UI designers to craft a seamless user experience, resulting in a user-friendly interface that enhances productivity and engagement.

Tech stack: React, Javascript, RTK (React Query), CSS, SASS, Node js, MixPanel

EM | HashedIn By Deloitte   *Aug'20 - Nov'22*
A software development company, building deep tech SAAS products and platforms.

Operations Metrics Portal
Created an automated reporting portal to streamline organizational workflows and reduce manual tasks, leading to notable time and resource efficiencies.
- ❖ Implemented key modules including Bench and Availability, Attrition, and Headcount, enhancing data visibility and enabling informed decision-making.
- ❖ Led the frontend development efforts, ensuring adherence to best practices and delivering high-quality solutions.

Tech stack: React, Javascript, Html, CSS, SASS, Python, Django, SQL

Employee Information Portal
Engaged to develop resource management portal to manage employees personal and professional data and thereby automate resource utilisation and optimisation
- ❖ Developed modules like My profile, Employee Directory ,Self-service ,Onboarding Form and Raise Request.
- ❖ Led a team of 2 interns for proving Guided Tour feature on dashboard for better customer experience and understanding.

Tech stack: React, Javascript, Html, CSS, SASS, Python, Django

RT Tool
Created an internal performance review tool to facilitate ongoing assessment of employee performance and gather actionable insights on project progress and timelines.
- ❖ Designed and implemented modules such as Self Assessment, Manager Assessment, Reviewer Assessment, Tech Showcase, and Manager 1 on 1 to cater to diverse review needs and ensure comprehensive evaluation.

Tech stack: React, Javascript, Html, CSS, SASS, Python, Django
