Pedro Miranda Nowak
Full Stack Developer

LinkedIn | pedromirandanowak@gmail.com | GitHub

Full Stack Developer with a background in responsive web application development, delivering high-quality software, along with remarkable sociability that has helped me excel in teamwork. Specialized in Front End development, with knowledge in agile methodologies, GIT, GitHub, JavaScript, algorithms, and CSS frameworks. I have experience in both Front End and Back End development using React JS, along with ExpressJS, Sequelize and PostgreSQL, among other technologies. Proactive, perseverant, and actively attentive. English level: C2 Proficient

PROJECTS

ReactJS Software Engineer – Team International   Jul 23 – Jan 24

I worked on maintaining a complex inventory management application as a full-stack developer, with a primary focus on the Front End. My responsibilities included identifying and resolving production bugs, as well as contributing to feature development and updates. I worked in a complex Agile Scrum environment with a diverse team spanning the globe, including people from different time zones and cultures. This project has greatly contributed to the development of my React JS skills taking a much deeper dive into it, thanks to the complexity of the app and its requirements.

Front End: React JS
Back End: ExpressJS, Microservices focus on Java.
Database: PostgreSQL

Full Stack Web Developer - Dashboard Admin "Aquí Estoy"   Apr 23 - May 23

Designed and developed an administration dashboard that included features such as appointment booking system, filtering and sorting, adaptability based on the user's time zone, handling multiple user roles, login system, and internal user management. Implemented user creation and extensive configuration of appointment grids. Developed a creative way to visualize appointment availability over time. Analyzed, built, and designed high-quality software with responsive capabilities, providing a pleasant user experience.

Front End: React JS
Back End: ExpressJS
Database: PostgreSQL and Sequelize.

Full Stack Web Developer - SPA Countries   Mar 23 - Apr 23
Academic Experience: Henry Bootcamp

   Designed and developed a countries app that included features such as displaying a catalog, combined filters, sorting, search functionality, creation forms, and the ability to interact with and store data in the database through the Back End. Used Restful APIs for data consumption.
Analyzing, building, and designing high-quality software with responsive capabilities, providing a pleasant user experience.

Front End: React JS
Back End: ExpressJS
Database: PostgreSQL and Sequelize.
